

Index for a key word, you will find still more information on a given topic. **QUOTATIONS IN THE BOOK**—There are 1,352 quotations in the book, nearly all of them from evolutionist scientists. Those statements provide you with solid scientific facts from experts. Dates of quotation sources vary from Charles Darwin's time, down to 2006. **QUOTATION SOURCES**—Quotation references are always given immediately in the text, not off somewhere at the back of the book. You do not have to repeatedly flip pages to find references. (* before a name = he is not a Creationist.) **UNDERSTANDABLE CONTENT**—A primary objective of the book is to keep everything simple and easily understood. No complex mathematics are included. **MEASUREMENT EQUIVALENTS**—Each measurement (whether given in English or metric) is immediately followed within brackets by its equivalent. This is a feature rarely found even in scientific publications. That makes this book useful all over the world. **VARIATION IN CHAPTER CONTENT**—Because of its content, the second chapter of this book (The Big Bang and Stellar Evolution) lent itself to a somewhat different layout style than the other chapters. **That chapter condenses 116 large pages and is in a point-by-point summary arrangement. The remainder of the book is in a looser style.** **HOW TO USE THE BOOK**—This paperback, is excellent for (1) personal knowledge enrichment; (2) data when you need it on a certain science topic; (3) private school and home-school chapter reading or research topic assignments; (4) churchgroup study; and (5) sermon, prayer meeting, and lecture source material. The index at the back of the book will help you quickly find what you are looking for. There is enough material in this present book to form the basis for a sizeable number of high-school, college, or university research papers. Even those working on advanced theses will find the source material, provided here, extremely helpful. **SOMETHING TO THINK ABOUT** "The evolutionary establishment fears creation science because evolution itself

crumbles when challenged by evidence. In the 1970s and 1980s, hundreds of public debates were arranged between evolutionist scientists and creation scientists. The latter scored resounding victories, with the result that, today, few evolutionists will debate. Isaac Asimov, Stephen Jay Gould, and the late Carl Sagan, while highly critical of creationism, all declined to debate."—James Perloff, *Tornado in a Junkyard* (1999), p. 241. "It was because Darwinian theory broke man's link with God and set him adrift in a cosmos without purpose or end that its impact was so fundamental. No other intellectual revolution in modern times . . . so profoundly affected the way men viewed themselves and their place in the universe."—*Michael Denton, *Evolution: A Theory in Crisis* (1985), p. 67 [Australian molecular biologist]. "Unfortunately, in the field of evolution most explanations are not good. As a matter of fact, they hardly qualify as explanations at all; they are suggestions, hunches, pipe dreams, hardly worthy of being called hypotheses."—*Norman Macbeth, *Darwin Retried* (1971), p. 147. "No one has ever found an organism that is known not to have parents, or a parent. This is the strongest evidence on behalf of evolution."—*Tom Bethell, "Agnostic Evolutionists," *Harper's*, February 1985, p. 61. "As by this theory, innumerable transitional forms must have existed. Why do we not find them embedded in the crust of the earth? Why is not all nature in confusion instead of being, as we see them, well-defined species?"—*Charles Darwin (1866), quoted in H. Enoch, *Evolution or Creation*, p. 139. "Scientists have no proof that life was not the result of an act of creation."—*Robert Jastrow, *The Enchanted Loom: Mind in...* **For the whole story, please contact us for your free book - The Evolution Handbook. Over 3,000 scientific facts which annihilate evolutionary theory Including 1,350 scientific quotations or references, 43 pages of illustrations, a research guide, and a complete index The book is based on extensive research and is highly recommended by scientists and educators Evolutionary theory has affected the lives of millions. The book will help you recognize the scientific principles which are violated by the claims of that theory, in the areas of astronomy, biology, geology, physics, paleontology, and several other fields. Contents of the book - Introduction p.8 Preface: A Treasure House of Information p.9 The origin of the

book and how to use it 1 - History of Evolutionary Theory p.15 How modern science got into this problem 2 - The Big Bang and Stellar Evolution p.68 Why the Big Bang is a fizzle and stars cannot evolve out of gas 3 - The Origin of the Earth p.119 Why the Earth did not evolve out of a molten state 4 - The Age of the Earth p.126 Why the Earth is not millions of years old 5 - The Problem of Time p.160 Why long ages cannot produce evolutionary change 6 - Inaccurate Dating Methods p.167 Why the non-historical dating techniques are unreliable 7 - The Primitive Environment p.208 Why raw materials on earth cannot produce life 8 - DNA and Protein p.242 Why DNA and protein could not be produced by random chance 9 - Natural Selection p.283 Why natural selection only makes changes within species 10 - Mutations p.318 Why mutations cannot produce cross-species change 11 - Animal and Plant Species p.373 Why the species barrier cannot be broken 12 - Fossils and Strata p.411 Why the fossil/strata theory is a hoax 13 - Ancient Man p.519 Why there is no evidence humans have evolved from anything 14 - Effects of the Flood p.615 What actually happened after the Flood 15 - Similarities and Divergence p.691 Why similar structures are not an evidence of evolution 16 - Vestiges and Recapitulation p.717 You have no useless or unnecessary structures inherited from earlier life forms 17 - Evolutionary Showcase p.743 The best examples of evolution have proven worthless 18 - The Laws of Nature p.777 The laws of nature oppose the evolutionary theory 19 - Evolution, Morality, and Violence p.794 Evolutionary theory is ruining modern civilization 20 - Tectonics and Paleomagnetism p.831 The truth about plate tectonics and paleomagnetism 21 - Archaeological Dating p.834 Egyptian, and other, dates correlate archaeological finds with the Bible 22 - Evolutionary Science Fiction p.840 Fabulous fairy tales which only tiny children can believe 23 -

Scientists Speak p.856 Evolutionist scientists say the theory is unscientific and worthless 24 - Utterly Impossible p.895 Things evolution could never invent 25 - Latest Evolution Crisis p.906 Events from 1959 to 2006 26 - Summary of the Anthropic Principle p.944 Discovering a flood of coincidences 27 - Big Bang Creationism p.965 When opposites are combined Research Guide p.969 How to locate additional information for your research paper Subject Index p.979 The best way to find what you are looking for in this book Illustrations —The Scopes Trial p.40 Five Red-shifted Spectra p.94 The Polonium-218 Halo p.120 Earth's Magnetic Field p.140 Radiocarbon Death Dates p.194 Darwin's Famous Statement p.210 The Miller Apparatus p.228 The DNA Molecule p.244 Left- and Right-handed Amino Acid Molecule p.262 Tryptophan Synthetase A p.268 The Peppered Moth p.288 Five Types of Eyes p.300 Adenosine triphosphate (ATP) p.308 Damaging a Vehicle p.322 Irradiated Drosophila Fruit Flies p.346 Panthera Leo p.376 Comparing the Family Trees p.382 Sub-species of Dogs p.384 Standard Geologic Time Scale p.418-419 Index Fossils p.428 Every Phylum in the Cambrian p.440 Polystrate Trees p.474 Matterhorn and Folded Mountains p.500 Heart Mountain p.504 Comparing Gorilla and Man p.522 The Theoretical Ancestry of Man p.524 Arranging Java Man p.532 The Pieces of Piltdown Man p.534 Australopithecus p.538 Ecological Zonation p.622 Creation and the Flood in Chinese p.642 The Vapor Canopy p.650 The Glacial Period p.680 The "Five-Bone Limb" and Arm and Hand of a Bat p.700 The Aortic Arch p.702 "Gill Slits" p.728 One of Haeckel's Fraudulent Pictures p.734 Eohippus and the Horse Series p.744 Archaeopteryx p.760 The Entropy Problem p.782 Charles Darwin p.796 Out of the Dark Cave of Savagery p.808 Three Fairy Tales p.844 Biochemical Chart of a Single Human Cell p.978 Introduction - BY MATTHEW D. STAVER AND PETER S. RUCKMAN The book of Proverbs says that "he who states his case first seems right until another comes and

challenges him." That is certainly true regarding the theory of evolution. This book, The Evolution Handbook, is a must-read, because it presents scientific evidence that challenges the theory of evolution. The destructive nature of evolutionary theory has permeated most of our social sciences, undermined objective truth, and fostered nihilism. This book is a great tool for parents, teachers, and students who want to understand the truth about the origins of life. Everyone who is concerned about our future ought to read this book. —Matthew D. Staver, J.D., President, Liberty Counsel - Orlando, FL, a prominent Christian legal firm. The Evolution Handbook can easily replace as many as forty books on the subject. It is the final and definitive statement on everything that could be found in any library that deals with evolutionary theory, as it relates to astrophysics, biology, speciation, calendation, paleontology, or geochronology. The greatest thing about this book is its complete coverage. It can save you a lot of money in obtaining comprehensive data on evolutionary theory, and how to reply to it. The definitive work on the subject, it answers every basic theory; yet it is remarkably easy to read. —Dr. Peter S. Ruckman, Pastor, Bible Baptist Church, Pensacola, Florida, author of over three dozen books. **The book provides you with common sense facts which you can use in study, conversation, and research.** With an easy-to-read print size, you will want to keep this paperback for years to come—for general reading and to check on a controverted point. If you plan to take a science course in school, or go into any field related to science or technology, you will want to read this book several times. Many of the points will remain in your memory, so you can share them with others. **The scientific facts presented here will help insulate you from the desolating effects of evolutionary theory. The book is very interesting reading! Yet it is also an excellent reference manual. By using the table of contents and index, you can quickly find what you are looking for—just when you need it. By looking in the**
