

CLOSELY THIS SPECIMEN RESEMBLES THIS OTHER PIECE OF WOOD THEY'RE NEARLY IDENTICAL. IT'S INTERESTING TO NOTE THIS OTHER PIECE OF WOOD THAT THIS OTHER PIECE OF WOOD WAS DERIVED FROM A FRESH PIECE OF WOOD LIKE THIS JUST A FEW WEEKS AGO. THIS CLOSE SIMILARITY RAISES AN IMPORTANT QUESTION. IS IT REALLY TRUE THAT THIS PIECE OF COALIFIED WOOD FROM LASALLE, UTAH OR THIS PIECE OF COALIFIED WOOD FROM TEMPLE MOUNTAIN, UTAH, ARE REALLY 140 MILLION YEARS OLDER THAN THIS PIECE OF WOOD WHICH DAVID AND I RECENTLY OBTAINED IN SOME OF OUR EXPERIMENTS? NOT REALLY. LOCKED IN THESE AND OTHER COALIFIED WOOD SPECIMENS FROM URANIUM MINES IS SOME REMARKABLE EVIDENCE THAT TELLS QUITE A DIFFERENT STORY. TO SEE THAT EVIDENCE REQUIRES THAT THE COALIFIED WOOD SPECIMENS BE MOUNTED IN EPOXY, THINLY SLICED THEN PLACED ON GLASS SLIDES FOR OBSERVATION UNDER THE MICROSCOPE. UNDER THE MICROSCOPE CAN BE SEEN DISCOLORATIONS PRODUCED BY RADIOACTIVE PARTICLES EJECTED FROM TINY CENTERS--SOME ARE CIRCULAR, OTHERS ARE ELLIPTICAL, AS CAN BE SEEN IN THE PHOTOGRAPHS. THESE CIRCULAR AND ELLIPTICAL HALOS REQUIRED A SPECIAL SEQUENCE OF EVENTS TO FORM, SO SPECIAL IN FACT THAT THEY COMPLETELY OVERTHROW THE IDEA OF AN ANCIENT AGE OF COAL, POINTING INSTEAD TO COALS RECENT FORMATION GEOLOGICALLY SPEAKING. HOW RECENTLY? IN 1976 I (DR. ROBERT GENTRY) PUBLISHED MY RESULTS ON

THE STUDIES ON THESE LOGS IN THE OCTOBER 15, 1976 ISSUE OF SCIENCE. HERE'S WHAT I SAID IN THIS REPORT. "SUCH EXTRAORDINARY VALUES" (REFERRING TO THESE LEAD-URANIUM RATIOS) "ADMIT THE POSSIBILITY THAT BOTH THE INITIAL URANIUM INFILTRATION AND COALIFICATION COULD POSSIBLY HAVE OCCURRED IN THE PAST SEVERAL THOUSAND YEARS." IN OTHER WORDS I WAS SUGGESTING THAT COAL COULD FORM VERY RAPIDLY, GEOLOGICALLY SPEAKING. THIS INFORMATION HAS REMAINED UNCHALLENGED AND UNREFUTED IN THE OPEN SCIENTIFIC LITERATURE SINCE IT WAS PUBLISHED IN 1976. WE ARE THEREFORE ENTITLED TO DRAW SOME RATHER FIRM CONCLUSIONS ABOUT THE DATA. GEOLOGISTS HAVE ASSUMED THE EOCENE WAS ABOUT 60 MILLION YEARS AGO, THE CRETACEOUS, ABOUT 110 MILLION YEARS AGO, THE JURASSIC, 160 MILLION YEARS AGO, AND THE TRIASSIC, 225 MILLION YEARS AGO. BUT THE RESULTS WE'VE PRESENTED CONTRADICT THAT INFORMATION, SHOWING INSTEAD THE SIMULTANEOUS BURIAL OF ALL THESE FORMATIONS ABOUT SEVERAL THOUSAND YEARS AGO. THESE RESULTS PERTAIN TO...

FOR DECADES SCIENTISTS HAVE ADVANCED THE EVOLUTIONARY THEORY OF ORIGINS. OF AN EARTH THAT FORMED BY SLOW-COOLING OF molten mass over 4.5 billion years to make the foundation rocks of the continents--the granites. BUT HAVE SCIENTISTS CONSIDERED ALL THE EVIDENCE IN ARRIVING AT THEIR THEORY OF AN ANCIENTLY EVOLVING EARTH? WHAT IF THERE WAS EVIDENCE IN THE GRANITES THEMSELVES THAT SHOWED THEY FORMED RAPIDLY INSTEAD OF BY SLOW COOLING? WHAT IF THERE WAS

EVIDENCE THAT THESE SEDIMENTARY FORMATIONS COMPOSING THE GRAND CANYON WERE DEPOSITED QUICKLY INSTEAD OF SLOWLY? WHAT IF THERE WAS EVIDENCE THE CANYON ITSELF WAS CARVED OVER A SHORT TIME BY RAPID EROSIONAL PROCESSES? WHAT IF THERE WAS EVIDENCE REVEALING THAT COAL AND OIL CAN FORM RAPIDLY AND DID SO RECENTLY? WHAT IF THERE WAS EVIDENCE THAT DINOSAURS EXISTED NOT MILLIONS OF YEARS AGO BUT JUST A FEW THOUSAND YEARS AGO? AND WHAT IF IT WAS FOUND THAT NATURAL LAWS, THE GLUE WHICH HOLDS THE EVOLUTIONARY FRAMEWORK TOGETHER, CAN NOT EXPLAIN EVERYTHING IN EARTH HISTORY? WE WOULD THEN BE FORCED TO CONSIDER ANOTHER MODEL OF EARTH HISTORY. ONE THAT WOULD ACKNOWLEDGE THE POSSIBILITY THAT GEOLOGICAL RATES OF CHANGE IN THE PAST WERE MUCH GREATER THAN THOSE OBSERVED TODAY. IN THIS SCENARIO IT WOULD TAKE MUCH LESS TIME FOR VARIOUS GEOLOGICAL EVENTS TO OCCUR. WE WOULD THEN HAVE ALL THE INGREDIENTS FOR CONCLUDING THAT THE EARTH IS ACTUALLY QUITE YOUNG. BUT IS THERE ANY PUBLISHED SCIENTIFIC EVIDENCE WHICH CHALLENGES THE EVOLUTIONARY VIEW OF AN ANCIENT EARTH AND SUPPORTS A YOUNG EARTH? SCIENTIST DR. ROBERT GENTRY WHILE WORKING AT THE OAK RIDGE NATIONAL LABORATORY IN TENNESSEE HAS FOUND JUST THAT, PUBLISHING EVIDENCE WHICH CHALLENGES THE LONG TIME PERIOD OF EARTH'S HISTORY. IN 1977 THE

RESEARCH COMMUNICATIONS NETWORK PUBLISHED A SPECIAL BREAKTHROUGH REPORT ON THE RESULTS OF DR. GENTRY'S SCIENTIFIC PUBLICATIONS, CHARACTERIZING THEIR IMPLICATIONS AS FOLLOWS, "CURRENT PHYSICAL LAWS MAY NOT HAVE GOVERNED THE PAST. EARTH'S PRIMORDIAL CRUSTAL ROCKS, RATHER THAN COOLING AND SOLIDIFYING OVER MILLIONS OF YEARS CRYSTALLIZED ALMOST INSTANTANEOUSLY. SOME GEOLOGICAL FORMATIONS THOUGHT TO BE 100 MILLION YEARS OLD ARE IN REALITY ONLY SEVERAL THOUSAND YEARS OLD. GRANT THESE PROPOSITIONS AND ANY RESEARCHER WILL TELL YOU THE ENTIRE STRUCTURE OF HISTORICAL NATURAL SCIENCES WOULD DISSOLVE INTO FORMLESSNESS. FEW CERTAINTIES WOULD REMAIN. YET THESE VERY POSSIBILITIES AND OTHERS EQUALLY CHALLENGING HAVE BEEN SUGGESTED IN A REMARKABLE SERIES OF PAPERS PUBLISHED OVER THE PAST SEVERAL YEARS IN THE WORLD'S FOREMOST SCIENTIFIC JOURNALS--NATURE, SCIENCE, AND ANNUAL REVIEW OF NUCLEAR SCIENCE AMONG OTHERS." FROM RESEARCH COMMUNICATIONS NETWORK, BREAKTHROUGH REPORT, 1977. PART OF DR. GENTRY'S WORK REFERRED TO IN THIS QUOTE PERTAINED TO HIS WORK WITH COALIFIED WOOD, FROM WHAT IS KNOWN AS THE COLORADO PLATEAU, A BROAD GEOGRAPHICAL REGION ENCOMPASSING PARTS OF COLORADO, UTAH, ARIZONA, NEW MEXICO, AND NEVADA. USING THE MICROSCOPE AND MORE ADVANCED LABORATORY

EQUIPMENT HE ANALYZED THESE SPECIMENS OF COALIFIED WOOD FOR VARIOUS TYPES OF RADIOACTIVITY. HIS RESULTS HELP US TO UNDERSTAND HOW LONG IT TAKES COAL TO FORM, THE AGE OF THE COAL, AND THE AGE OF THE EARTH ITSELF. COAL--ONE OF EARTH'S VAST ENERGY RESOURCES. BEFORE WE CAN ANSWER THE QUESTION AS TO THE AGE OF COAL AND THE TIME OF ITS FORMATION, WE NEED TO ASK THE QUESTION, WHERE DID COAL COME FROM? IN THE COAL MINE IN PRICE, UTAH, U.S.A., WE HAVE THE ANSWER. THERE IS A LOG ALMOST COMPLETELY TURNED TO COAL. THERE ARE THOUSANDS OF SUCH LOGS IN THIS MINE AND IN OTHER MINES HERE IN THE PRICE AREA. THIS FACT TELLS US THAT GIVEN THE RIGHT CONDITIONS OF PRESSURE AND TEMPERATURE, AND WATER, AND TIME, THAT WOOD AND OTHER VEGETATION WILL TURN TO COAL. THE QUESTION IS HOW LONG DID IT TAKE FOR THAT TO HAPPEN? ROBERT GENTRY AND HIS SON DAVID, AN ASSOCIATE IN HIS FATHER'S WORK EXPLORE THIS TOPIC TOGETHER. TO ANSWER THIS QUESTION WE NEED TO LOOK AT COALIFIED WOOD SPECIMENS FROM URANIUM MINES INSTEAD OF COALIFIED WOOD LIKE THE LOG FROM ONE OF THE COAL MINES HERE IN THE PRICE, UTAH AREA. THIS COALIFIED WOOD SPECIMEN COMES FROM LASALLE, UTAH, A URANIUM MINE. IT'S PRESUMED GEOLOGIC AGE IS AROUND 140 MILLION YEARS. THIS SPECIMEN OF WOOD COMES FROM A URANIUM MINE IN THE TEMPLE MOUNTAIN AREA HERE IN UTAH. ITS PRESUMED AGE IS ALSO 140 MILLION YEARS. BUT LOOKING HOW
